DETAILED ACTION

Election/Restrictions

Newly added claims 41-58 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the original claims were directed towards setting policies for network service usage of an attached function and monitoring and modifying the policies based on detections of triggers of the network system, classified in **class 709, subclass 224**.

The newly added claims are directed towards acquiring information about an attached function, associating level a trust with the information, granting the entry, and establishing policy for the usage, classified in **class 709, subclass 217**

The two inventions are thus disclosed as sub-combinations being usable together, capable of functioning independently of each other. Restriction for examination purpose is required because the newly claimed invention functions in a different manner than the original invention and would require a new search that was not previously required.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits.
